MANITOU

Dextra lighten their loading

Lighting manufacturer expands fleet of lorry mounted telespcopic forklifts

As the leading UK manufacturer of commercial, retail and energy efficient lighting, Dorset-based Dextra Group plc. continue to expand their transport fleet with the purchase of an additional Manitou TMT lorry mounted telescopic forklift.

Tim Pickford, Operations Director for Dextra commented "We have been using Manitou TMT telehandlers for several years and have been impressed with their quality and reliability. They offer more flexibility than a masted lorry mounted forklift as they can load and unload a lorry from one side. They are also more suited to working on uneven or rough terrains."

The diesel-powered Manitou TMT range has a lift capacity of up to 2.7 tonnes and a lift height of 3.45 metres. It takes less than a minute to dismount the TMT from the carrying vehicle. This enables simple loading and unloading without having to rely on your customers for these operations, improving productivity and turnaround times.

Locators are authorised Manitou dealers and TMT specialists. They sell the complete range of Manitou equipment and offer full after sales support with a team of Manitou trained service engineers. Locators also have a comprehensive spare parts inventory that is available for overnight delivery.

John Griffiths, Business Development Manager for Locators added "The demand for the TMT range continues to grow, as the operation of this type of machine offers clear financial benefits for an operator. We offer a countrywide all-inclusive maintenance package to ensure your TMT is always operational and provide you with complete peace of mind."
